Projects

MedAppointment / MERN Stack, Responsive Web Design

Feb 2024 – Mar 2024

- Developed a hospital appointment booking website using React for the frontend, Node.js for the backend, and MongoDB for the database. Users can create accounts, select doctors based on experience and fees, book appointments, and make advance payments
- Ensured a seamless, secure user experience by utilizing Postman for API testing. Enabled dynamic data handling and robust user authentication, allowing doctors to update profiles and manage appointment schedules
- Github Repository Link: <https://github.com/Shiv1431/AppointmentBooking>

Mix N Muscle / Html, CSS and Java Script

Oct 2023 – Nov 2023

- Developed a webpage allowing customers to log in and access a menu of protein-rich food options, along with nutritional information for each product
- Implemented a seamless ordering system, enabling customers to pre-order food items and make advance payments, ensuring efficient service and eliminating wait times upon arrival
- Github Repository Link: <https://github.com/Shiv1431/Mix-N-Muscle>

Car Race | Java Swing, MySQL

Mar 2023 – Apr 2023

- Developed an application allowing users to play a car racing game
- Utilized Java Swing to implement a graphical user interface for the game environment
- Github Repository Link: <https://github.com/Shiv1431/Car-Race>

Employee Payroll Management System | Python

Sept 2022 – Oct 2022

- Created an interface that allows the administrator to enter and retrieve personnel data
- Made use of file handling to manage data effectively
- Added feature that allows them to get paid extra for working overtime in addition to their usual daily compensation
- Github Repository Link: <https://github.com/Shiv1431/pythonGUI>

Certificates
